它起源于哪里？

恰恰与流行观念相反，**Lorem Ipsum**并不是简简单单的随机文本。它追溯于一篇公元前**45**年的经典拉丁著作，从而使它有着两千多年的岁数。弗吉尼亚州**Hampden-Sydney**大学拉丁系教授**Richard McClintock**曾在 **Lorem Ipsum**段落中注意到一个涵义十分隐晦的拉丁词语，“**consectetur**”

About Future Student Current Student Faculty Research Contact

[Home](#) > [About](#)

About

The Faculty of Engineering and Applied Science was established in 1973 and, early on, sought to mark itself as a new, progressive engineering school offering unique programs based on the principles of systems engineering.

Dean's Message

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

Our Vision

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

Faculty Strategic Plan

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

[Home](#) > [Programs](#) > ESE

Our Program

The Electronic Systems Engineering (ESE) program at the University of Regina focuses on a core program of analog and digital electronics with specialization streams in: instrumentation and control, telecommunications, micro-electronics, and power and energy.

Software and computer-related courses are part of the electronics core program, allowing students to develop greater facility with both hardware and software.

As an electornics engineer, you could be involved in a wide variety of exciting projects from designing life-support systems for hospitals to developing solar panels to be used in space.

Careers in SSE

Software Systems Engineers typically work in the following areas or hold the following job titles:

- Avionics
- Communications
- Computer Design
- Electronic Systems Engineer
- Engineering Management
- Hardware Systems Engineer
- Manufacturing & Processing
- Power Electronics
- Power Electronics

Our Program

The Software Systems Engineering (SSE) program is designed to give students the knowledge to analyze, design, and develop software operating on many types of computers and microprocessors.

All engineering students take a common initial core program consisting of the basic maths and sciences needed by all engineers, plus introductory design courses.

Our SSE students apply computational theories to real-life programming techniques; analyze software requirements; design, implement, and test software systems; plan and manage software projects; solve technical problems; and practice co-design and embedded systems construction.

Careers in SSE

Software Systems Engineers typically work in the following areas or hold the following job titles:

- Design Engineer
- Embedded Systems Engineer
- Integration Engineer
- Multimedia Engineer
- Software Developer
- Software Process Engineer
- Software Project Manager
- Software Quality Engineer
- Software Systems Engineer

What is Engineering?

A branch of science and technology concerned with the design, building, and use of engines, machines, and structures.

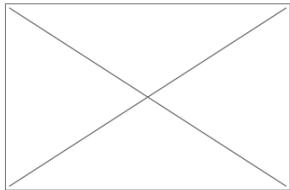

Software Systems Engineering (SSE)

Software Systems Engineers apply computing knowledge to solve real-life problems. They become engineering professionals and leaders in a broad scope of projects. [Learn more about SSE!](#)

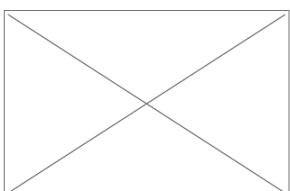

Electronic Systems Engineering (ESE)

Electronic Systems Engineering focuses on the integration of electronics, computers, and communication technologies in many different types of systems. [Learn more about ESE!](#)

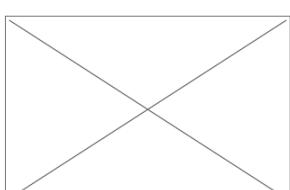

Petroleum Systems Engineering (PSE)

Petroleum Systems Engineers develop techniques to efficiently recover oil, gas, and other minerals while reducing environmental impacts using various pollution remediation and greenhouse gas reduction techniques. [Learn more about PSE!](#)

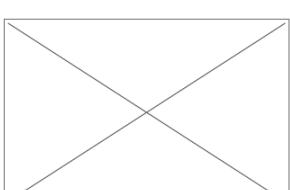

Environmental Systems Engineering (EVSE)

Our Environmental Systems Engineering (EVSE) program is very popular with students and respected by industry, largely because of its timely combination of environmental concerns and the systems approach to addressing civil and industrial environmental issues. [Learn more about EVSE!](#)

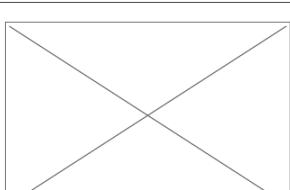

Industrial Systems Engineering (ISE)

The Industrial Systems Engineer becomes an engineering generalist with specialized training in the nature, behaviour, control, and monitoring of engineering systems. [Learn more about ISE!](#)

Process Systems Engineering (PSEng)

Process Systems Engineering (PSEng) is a broad category of engineering that deals with the process design for the purpose of converting raw goods to usable end products. [Learn more about SSE!](#)

MINORS FOR SYSTEM ENGINEERING PROGRAMS

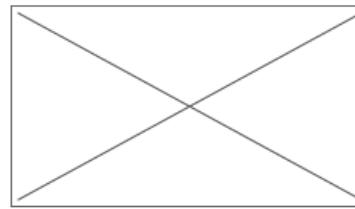

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.

Our Program

The Software Systems Engineering (SSE) program is designed to give students the knowledge to analyze, design, and develop software operating on many types of computers and microprocessors.

All engineering students take a common initial core program consisting of the basic maths and sciences needed by all engineers, plus introductory design courses.

Our SSE students apply computational theories to real-life programming techniques; analyze software requirements; design, implement, and test software systems; plan and manage software projects; solve technical problems; and practice co-design and embedded systems construction.

Careers in SSE

Software Systems Engineers typically work in the following areas or hold the following job titles:

- Design Engineer
- Embedded Systems Engineer
- Integration Engineer
- Multimedia Engineer
- Software Developer
- Software Process Engineer
- Software Project Manager
- Software Quality Engineer
- Software Systems Engineer

What is Engineering?

A branch of science and technology concerned with the design, building, and use of engines, machines, and structures.

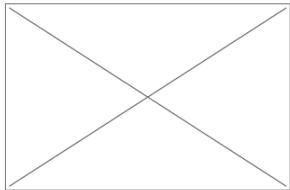

Software Systems Engineering (SSE)

Software Systems Engineers apply computing knowledge to solve real-life problems. They become engineering professionals and leaders in a broad scope of projects. [Learn more about SSE!](#)

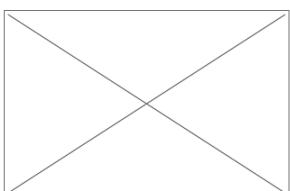

Electronic Systems Engineering (ESE)

Electronic Systems Engineering focuses on the integration of electronics, computers, and communication technologies in many different types of systems. [Learn more about ESE!](#)

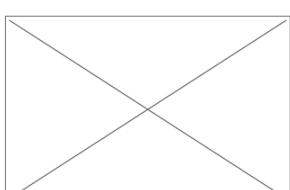

Petroleum Systems Engineering (PSE)

Petroleum Systems Engineers develop techniques to efficiently recover oil, gas, and other minerals while reducing environmental impacts using various pollution remediation and greenhouse gas reduction techniques. [Learn more about PSE!](#)

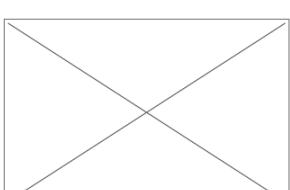

Environmental Systems Engineering (EVSE)

Our Environmental Systems Engineering (EVSE) program is very popular with students and respected by industry, largely because of its timely combination of environmental concerns and the systems approach to addressing civil and industrial environmental issues. [Learn more about EVSE!](#)

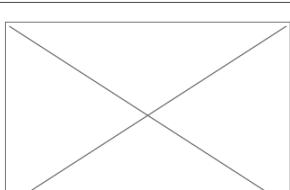

Industrial Systems Engineering (ISE)

The Industrial Systems Engineer becomes an engineering generalist with specialized training in the nature, behaviour, control, and monitoring of engineering systems. [Learn more about ISE!](#)

Process Systems Engineering (PSEng)

Process Systems Engineering (PSEng) is a broad category of engineering that deals with the process design for the purpose of converting raw goods to usable end products. [Learn more about SSE!](#)

The screenshot shows the homepage of the University of Regina Faculty of Engineering and Applied Science. At the top, there is a header with the University of Regina logo and the text "Faculty of Engineering and Applied Science". A search bar with the placeholder "search" is located in the top right corner. Below the header is a green navigation bar with links for "About", "Future Student", "Current Student", "Faculty", "Research", and "Contact". The main content area features a large graphic of two intersecting diagonal lines forming an 'X' shape.

Academic Advising

Academic Advising is available to assist with your success as a university student. Academic advisors provide invaluable information regarding your academic program, and connect you to other student services available on campus that may help you achieve your academic goals.

[Book an appointment](#)

Students Services

The staff in the General Engineering Office can assist with general enquiries, course registration issues, deferrals, and application forms for several requests.

Phone: 306-585-4734
Email: engg@uregina.ca
Hours:
Monday-Wednesday-Thursday-Friday
8:45-12:00 and 1:00-4:30
Tuesday's open at 10:00
